

SQL Server Application Development Best Practices

DO WE STILL NEED TO THINK IN SQL?

Rudi Bruchez

SQL SERVER CONSULTANT AND TRAINER

www.linkedin.com/in/rudibruchez/ www.babaluga.com

Summary

Where do we go with this course?

The Pachadata company

The Declarative approach

How to properly work with databases?

Where does the relational model come from?

I Will Talk About ...

The relational model
Where it all began

SQL
Where the magic happens

SQL Server
Where it falls into place

I Will Talk About ...

The relational model
Where it all began

SQL
Where the magic
happens

SQL Server
Where it falls into
place

Our Example: Pachadata Training

Pachadata

SQL Server

C#

Go Online, Pachadata!

Pachadata
on the web

PM1

...

Entity Framework?

NoSQL?

Slide 6

PM1 Does this need to be on its own line or should it follow web?
Paul Madden, 1/11/2018

Stateful

Stateful

Fridge Effect

Stateless

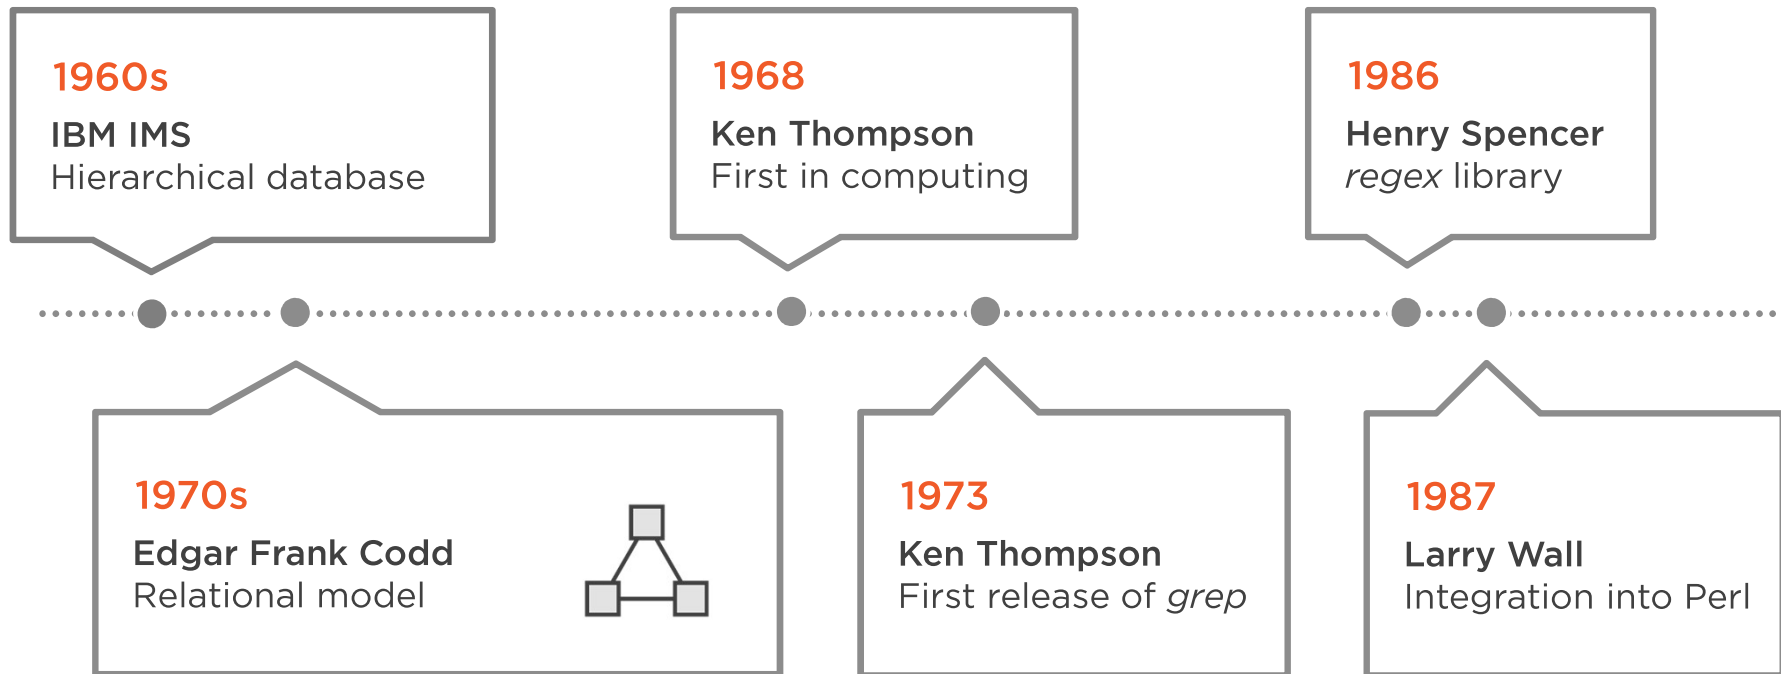

Local Scope

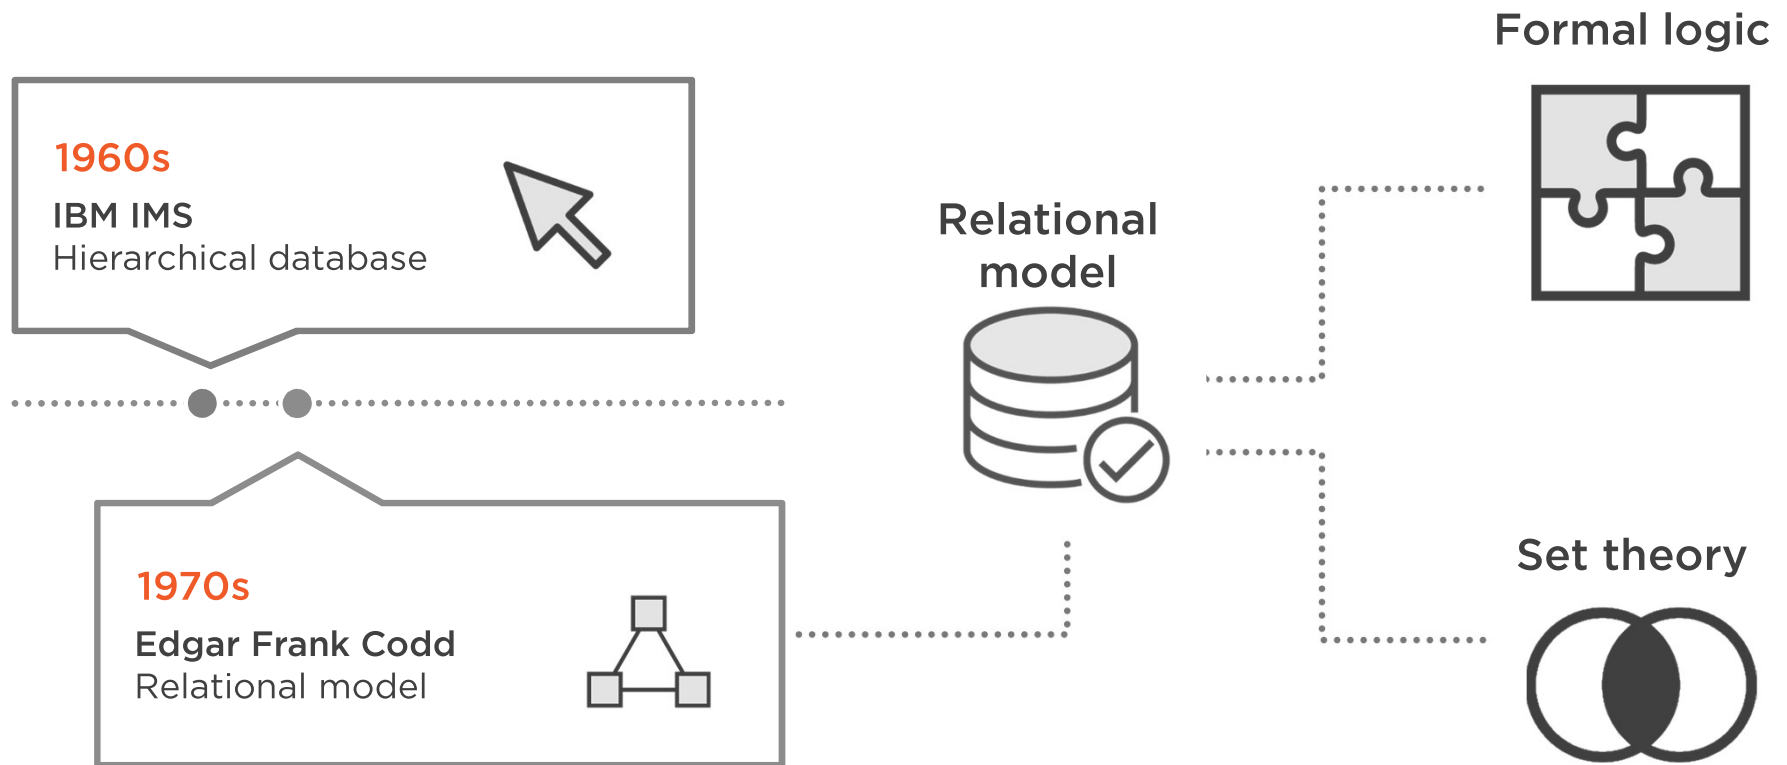

Formal, Logic

Database Time Machine

From Imperative to Declarative

Imperative vs Declarative

Imperative
Programming

Declarative
Programming

Conclusion

Pachadata

Imperative vs.
Declarative

C#

Stateful vs. Stateless

Set-oriented

SQL
